## EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Cancel claims 1-8 as being drawn to a non-elected invention without traverse, applicant reserves the right to pursue said claims in subsequent continuing applications.
2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to anticipate or make obvious the structure of woodworking machine with at least a braking spacing detection element/sensor for detecting the space between the brake and the cutter; and a control system for preventing operation of the cutter depending upon the detected spacing.

It should be noted that for the purpose of interpretation of the claim language the phrase "adapted to" has be interpreted as "for". Although, one may argue that, e.g., most controls and detections systems are capable of being adaptable for numerous functions, the instant claims require that the detection and control systems perform specific functions not found in the prior art nor are any of the prior art references of record capable of said functions.

The references Herman and Steckler et al. are cited to show braking devices that discuss the need for brake pads to be adjustable relative to brake drums to ensure

quick and effective braking. However, these references fail to teach or fairly suggest the instant claim language, more specifically, detecting the spacing such that operation is prevented depending upon the detected spacing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Boyer D. Ashley whose telephone number is 703-308-1845. The examiner can normally be reached on Monday-Thursday 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on 703-308-1082. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
